Encyclopedia of Global Environmental Governance and Politics

Edited by **Philipp H. Pattberg**, VU University Amsterdam, the Netherlands and **Fariborz Zelli**, Lund University, Sweden

'The Encyclopedia of Global Environmental Governance and Politics provides a comprehensive starting-point for understanding the complex and contested nature of global environmental governance. Pattberg and Zelli have assembled an impressive array of contributions written by leading scholars in their fields. The superbly edited volume provides an indispensable knowledge base for understanding – and tackling – the environmental challenges of the emerging Anthropocene'

– Robert Falkner, London School of Economics and Political Science, UK and editor, *Handbook of Global Climate and Environment Policy*

Monetary Policy and Crude Oil

Prices, Production and Consumption

Basil Oberholzer, Global Infrastructure Basel Foundation, Switzerland

The global crude oil market is critically important in many respects. It is the fuel that drives the global economy and, as such, is the focus of climate policies. Moreover, crude oil is the basis of a tradable financial asset. It is therefore connected to several outstanding macroeconomic developments of recent years, including financial market fluctuations, the financial crisis and the exceptional conduct of monetary policy. This book investigates the impacts of monetary policy and the financial system on the global crude oil market. Furthermore, it outlines how monetary policy may also be used to guarantee stability and to contribute to ecological sustainability.

The Law and Policy of Biofuels

Edited by **Yves Le Bouthillier**, University of Ottawa, Canada, **Annette Cowie**, University of New England, **Paul Martin**, University of New England, Armidale NSW, Australia and **Heather McLeod-Kilmurray**, University of Ottawa, Canada

In the last twenty years the biofuels industry has developed rapidly in many regions of the world. This book provides an in-depth and critical study of the law and policies in many of the key biofuels producing countries, such as Brazil, China, the US, as well as the EU, and a number of other countries where this industry is quickly developing. The multidisciplinary contributors examine the roles of the public and private sectors in the governance of biofuels. They propose recommendations for more effective and efficient biofuel policies.

A Guide to EU Renewable Energy Policy

Comparing Europeanization and Domestic Policy Change in EU Member States

Edited by **Israel Solorio**, National Autonomous University of Mexico and **Helge Jörgens**, Freie Universität Berlin, Germany
Foreword

with a foreword by Rainer Hinrichs-Rahlwes

'Renewable energy policy is a well-established, high-ranking policy in Europe but its perspectives, strengths and weaknesses need competent analysis. This book is a highly valuable "standard" publication not only for energy and climate policy experts but also for political and social scientists.'

– Martin Jänicke, Freie Universität Berlin, Germany

This remarkable guide is the first comprehensive attempt to shed light on the complex dynamics of renewable energy promotion in the European multilevel system. Theoretically driven, the study employs Europeanization as an analytical framework for assessing policy change, both at the EU level and in the member states, and compares the development of renewable energy policies in the electricity and transport sectors from the 1980s to the present.

Shale Gas and the Future of Energy

Law and Policy for Sustainability

Edited by **John C. Dernbach** and **James R. May**, Widener University, US

'Dernbach and May have brought together a marvelous collection of essays that join two inseparable issues: shale gas and sustainability. Each of the 12 articles, written by important authors, together with an introduction and conclusion from Dernbach and May, offers insightful recommendations on how to explore shale gas around the globe in a sustainable way.'

Handbook on the Politics of Antarctica

Edited by **Klaus Dodds**, Royal Holloway, University of London, UK, **Alan D. Hemmings**, University of Canterbury, New Zealand and **Peder Roberts**, KTH Royal Institute of Technology, Sweden

'Antarctica is known as a continent for science, yet to understand this vast polar region requires an understanding of its politics as much as it does knowledge of the dynamics of its ice shelves, its sub-glacial lakes, its oceanography, and its role in the global climate system. This comprehensive, superbly-edited volume of well-crafted essays provides up-to-date coverage on a range of contemporary issues, including governance, regulation, international law, tourism, images, and representations. This is essential reading for anyone concerned with the politics of and about Antarctica and its global relevance.'

The Green Market Transition

Carbon Taxes, Energy Subsidies and Smart Instrument Mixes

Edited by **Stefan E. Weishaar**, University of Groningen, the Netherlands, **Larry Kreiser**, Cleveland State University, **Janet E. Milne**, Vermont Law School, US, **Hope Ashiabor**, Macquarie University, Australia and **Michael Mehling**, Massachusetts Institute of Technology, US

The Paris Agreement's key objective is the strengthening of the global response to climate change by transitioning the world to an increasingly green economy. In this book, environmental tax and climate law experts examine carbon taxes energy subsidies, and support schemes for carbon and energy policies. Chapters reflect on the underlying policy dynamics and the constraints of various fiscal measures, and consider the harmonisation of smart instrument mixes.

Critical Issues in Environmental Taxation series

Research Handbook on Emissions Trading

Edited by **Stefan E. Weishaar**, University of Groningen, the Netherlands

'For all its conceptual simplicity, emissions trading has proven a remarkably challenging policy instrument to implement in practice. With a growing number of jurisdictions around the world embracing carbon markets to achieve their climate targets, an improved understanding of instrument design and operation – including the complex spillover dynamics encountered in existing systems – has never been more critical. This book, ably edited by a leading scholar in the field, makes an important and timely contribution to the literature, bringing together experts from a wide variety of backgrounds to dissect the accumulated body of empirical evidence and expand the boundaries of our knowledge on emissions trading.'

– Michael A. Mehling, Massachusetts Institute of Technology, US

Environmental Impact Assessment in the Arctic

A Guide to Best Practice

Timo Koivurova and **Pamela Lesser**, University of Lapland, Finland, with **Sonja Bickford**, University of Nebraska, Kearney, US, **Paula Kankaanpää**, Finnish Environment Institute, Finland and **Marina Nenashva**, Northern Arctic Federal University, Russia

'Anyone interested in what makes environmental impact assessment (EIA) work, in any legal system, should own this book and refer to it often. The authors of this scholarly, practical and engaging study keenly observe the political, legal and cultural influences that explain the surprising national differences in the effectiveness of EIA around the Arctic. Their careful and systematic analysis of each country's system is prefaced by an insightful discussion of the literature and theory behind best practices. Each chapter is concise yet complete and documented by a well-chosen bibliography.'

The Challenges of Collaboration in Environmental Governance

Barriers and Responses

Edited by **Richard D. Margerum**, University of Oregon, US and **Cathy J. Robinson**, Commonwealth Scientific and Industrial Research Organisation (CSIRO) and Charles Darwin University, Australia

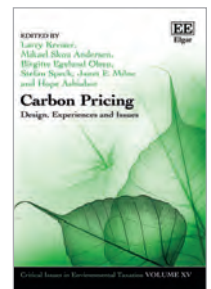

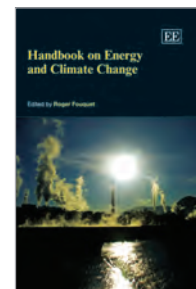

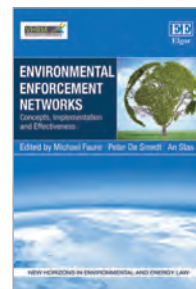

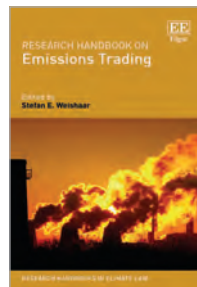

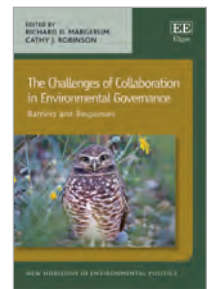

'This book will be invaluable for anyone interested in collaborative planning, management or governance. It includes significant articles from some of the leading scholars in these fields, as well as insightful research from a new generation. It is an impressive compendium, a good read, and a useful coursebook.'
