**Overriding Mandatory Rules in International Commercial Arbitration**

**Hossein Fazilatfar**, Western Carolina University, US

*'Hossein Fazilatfar's treatise deftly navigates a complex and enduring problematique of international arbitration scholarship and practice – how to reconcile the parties' contractual bargain regarding choice-of-law with due consideration of imperative substantive rules while delivering an arbitral award that is minimally exposed to challenge or set aside claims. In doing so, he adds invaluable structure and methodology to the "unruly horse" of public policy/ mandatory law, deliberations about which have grown in number and complexity over the years. His book reminds us of the responsibility that arbitrators bear when addressing this problematique on a case-by-case basis, and the sophistication required to do so. Fazilatfar's insightful solutions and critiques enlarge the analytical toolkit available to arbitrators, as well as to practitioners, students and the academy, to discharge that responsibility.'*

### Conflict of Laws: A Comparative Approach

Text and Cases

Gilles Cuniberti, University of Luxembourg

*'While comparison has always been important in the conflict of laws, it is crucial today, in a context of accelerated exchange and diversified societies. But the materials have become, correlatively, so abundant that teaching a satisfactory class in this field is now a considerable challenge. Cuniberti has selected and assembled the most significant sources from various legal traditions, and guides the student through each carefully constructed chapter by a series of questions, US case book style. An excellent pedagogical tool!'*

### Advanced Introduction to Private International Law and Procedure

Peter Hay, Emory University, School of Law, US

Litigating disputes in international civil and commercial cases presents a number of special challenges. Which country's courts have jurisdiction, and where is it advantageous to sue? Given the international elements of the case, which country's law will the court apply? Finally, if a successful plaintiff cannot find enough local assets, what does it take to have the judgment recognized and enforced in a country with assets? *Advanced Introduction to Private International Law and Procedure* addresses these questions through a comparative overview of legal systems, contrasting Anglo-American common law and the civil law approach of the European Union.

Key features include:

- Comparative overview of legal systems, contrasting Anglo-American common law and the civil law approach of the European Union
- Written in a clear and engaging style
- Addresses classic choice of law as well as international civil procedure
- Problem-oriented presentation
- Three parts presenting principal problems parties face in dealing with cases with an international dimension
- Considers how the field could develop in the future.

### Global Private International Law

Adjudication without Frontiers

Edited by Horatia Muir Watt, SciencesPo Law School, France, Lucia Bíziková, Trainee in an international law firm, London, UK, Agatha Brandão de Oliveira, Federal University of Espírito Santo (UFES), Brazil and member of the Brazilian Bar and Diego P. Fernández Arroyo, SciencesPo Law School, France

Providing a unique and clearly structured tool, this book presents an authoritative collection of carefully selected global case studies. Some of these are considered global due to their internationally relevant subject matter, whilst others demonstrate the blurring of traditional legal categories in an age of accelerated cross-border movement. The study of the selected cases in their political, cultural, social and economic contexts sheds light on the contemporary transformation of law through its encounter with conflicting forms of normativity and the multiplication of potential fora.

### Private International Law

Contemporary Challenges  
and Continuing Relevance

Edited by Franco Ferrari, New York University School of Law, US and Diego P. Fernández Arroyo, SciencesPo Law School, Paris, France

*'Globalization has tremendously enhanced the number of cross-border transactions and, thereby, the significance of the conflict of laws. But is the localization method conceived in the 19th century for both jurisdiction and the applicable law still appropriate in the 21st? Can it serve purposes of global governance, give effect to universal values, allow for the implementation of national policies, provide legal certainty? The editors and authors, outstanding scholars in this area, provide thoughtful and interesting answers to these pressing questions.'*
