

Managing Food Safety and Hygiene

Governance and Regulation as Risk Management

Bridget M. Hutter, Professor of Risk Regulation, Department of Sociology, London School of Economics and Political Science, UK

Food safety and hygiene is of critical importance to us all, yet, as periodic food crises in various countries each year show we are all dependent on others in business and public regulation to ensure that the food we consume in the retailing and hospitality sectors is safe. Bridget Hutter considers the understandings of risk and regulation held by those in business and considers the compliance pressures on managers and owners, and how these relate to understandings of risk and uncertainty.

'One of the most thorough and considered studies we have of the relationship between regulation and business risk management practices. Food regulation provides a revealing canvas for understanding the dynamics of the governance of risk.'

– John Braithwaite, Australian National University
