Sustainable Business

Theory and Practice of Business under Sustainability Principles

Edited by Geoffrey Wells, formerly University of South Australia

Recent surveys of international CEOs confirm that companies increasingly see sustainability as critical to their business strategy. The rigorous academic framework for the field of sustainable business required to respond to this need is now emerging. This book presents important new work in the theory of the sustainable firm, in the application of sustainability principles to key management disciplines, in sustainable business in practice, and in the international challenges that are critical to sustainability demands.

“This is an immensely useful and important book. By applying sustainability theory and practice to all areas of business management for firms of all sizes it has the potential to make a significant difference to the long term viability of businesses and the societies in which they operate.’
– Juliet Roper, The University of Waikato, New Zealand
