Handbook of Protest and Resistance in China

Edited by Teresa Wright, Chair & Professor, Department of Political Science, California State University, Long Beach, US

Featuring contributions from top scholars and emerging stars in the field, the Handbook of Protest and Resistance in China captures the complexity of protest and dissent in contemporary China, while simultaneously exploring a number of unifying themes. Examining how, when, and why individuals and groups have engaged in contentious acts, and how the targets of their complaints have responded, the volume sheds light on the stability of China's existing political system, and its likely future trajectory.

'Teresa Wright's edited volume, Handbook of Protest and Resistance in China, is a superlative piece of scholarship, and importantly, gives readers an up-to-date, robust, and comprehensive series of chapters into the myriad and growing forms of dissent across the country.'

– J.R. Lacharite, Journal of Chinese Political Science

'This collection is the most comprehensive study on various forms of popular contention by different groups in contemporary China. By analysing group-specific action, varied government response and the effect of contention, this book coherently and convincingly explains the political rationale for the coexistence of popular contention and regime stability in an authoritarian state that has been undergoing significant political and socio-economic changes. This collection makes important contributions to the understanding of contentious politics, political participation, and state-society relations in contemporary China.'

– Yongshun Cai, Hong Kong University of Science and Technology

'Made up of chapters by an appealing mix of well established and more junior scholars, this volume brings together in one place illuminating work on the widely varied forms that protest and resistance have been taking across the People's Republic of China – and continue to take even in a time of ratcheted up controls. As different as the sources of discontent and styles of agitation are in disparate parts of the country and among disparate groups, something is lost when varied struggles are considered only in isolation. Wright’s carefully put together and very effectively introduced Handbook show how much we can learn from placing side-by-side actions as varied as petition drives and marches occurring in settings as dissimilar as Hong Kong and Hunan.'

– Jeffrey Wasserstrom, University of California, Irvine, US

'No book on popular contention in China covers this much territory. All the important social groups are here as well as every conceivable type of resistance. This Handbook will provide a "one-stop shopping" for students of Chinese protest and repression for years to come.'

– Kevin J. O’Brien, University of California, Berkeley, US
