Both law and economics and intellectual property law have expanded dramatically in tandem over recent decades. This field-defining two-volume Handbook, featuring the leading legal, empirical, and law and economics scholars studying intellectual property rights, provides wide-ranging and in-depth analysis both of the economic theory underpinning intellectual property law, and the use of analytical methods to study it.

'This remarkable set of books is a who's-who of IP scholars comprehensively summarizing IP scholarship. This isn't just a master's course in IP; it's several decades of knowledge condensed into two volumes.'

– Mark A. Lemley, Stanford Law School, US
