This timely Research Agenda examines the ways in which public–private partnerships (PPPs) in infrastructure continue to excite policy makers, governments, research scholars and critics around the world. It analyzes the PPP research journey to date and articulates the lessons learned as a result of the increasing interest in improving infrastructure governance. Expert international contributors explore how PPP ideas have spread, transferred and transformed, and propose a range of future research directions.

‘Public–private partnerships have been a major development in public sector reform around the world in recent decades – but their role remains hotly contested. In this book, Carsten Greve and Graeme Hodge, as major contributors to the field, bring together leading scholars to provide an in-depth survey of current research into PPPs and key avenues for future research. With its outstanding analytical depth and comprehensive range of topics, it offers an indispensable guide for both researchers and government policymakers.’

– Tony Bovaird, University of Birmingham, UK

‘The world of PPPs and infrastructure governance is perilously complex, but this must-read book is the key to unlock the evolution of and momentum behind the global research agenda. Reading the individual contributions, I felt thrilled, impressed and humbled. Thrilled about the quality and diversity of research from long-established and newer authors. Impressed by the combination of fine eyes for detail and the identification of overarching themes, all explained in reader-friendly language. Humbled by the multitude of research challenges that remain.’

– Professor Emerita Pam Stapleton, The University of Manchester, UK

‘This edited volume makes a major contribution to the literature on public–private partnerships (P3s). Utilizing both cross-national and interdisciplinary approaches, the book assesses the current state of P3 research and suggests new avenues for future enquiry.’

– Professor Lawrence Martin, University of Central Florida, US

‘This volume is an invaluable resource for scholars interested in public–private partnerships in infrastructure. Drawing on a broad range of disciplinary perspectives, it explains what we have already learned about partnerships, and identifies the critical questions that remain to be answered. All of this is done in a crisp and accessible style.’

– Professor Alasdair Roberts, University of Massachusetts, Amherst, US
