Handbook of Accounting and Sustainability

Research Handbooks in Accounting series

Edited by Carol A. Adams, Professor of Accounting, Durham University Business School, UK

This Handbook provides a comprehensive study of research, practice and policy at the nexus of accounting and sustainability, or sustainable development. Chapters explain key drivers of developments at the nexus, critique those developments, summarise the findings of research on key themes in the field, and suggest areas for further research, offering evidence-based practice and policy solutions.

'The Handbook of Accounting and Sustainability presents thorough coverage of the issues, the obstacles, and the opportunities within the sustainability accounting domain. The compilation is an excellent read and is a valuable resource for anyone interested in exploring the role that accounting could play in addressing our world’s problems.'
