Recent Developments in Ecological Economics

Edited by Joan Martínez-Alier, Professor of Economics and Economic History, Universitat Autònoma de Barcelona, Spain and Inge Røpke, Aalborg University, Denmark

Ecological economics is an increasingly important subject that addresses the current conflict between positive economic growth and negative environmental consequences. In this state-of-the-art two-volume set, the editors, both leading scholars in their field, have selected the most important recently published papers on the subject. This authoritative collection will be a vital resource for researchers and practitioners in ecological economics, human ecology, industrial ecology and environmental sciences.

‘An excellent source of reference for researchers and practitioners in ecological economics, human ecology, industrial ecology and environmental sciences, this publication will help its readers keep abreast of major recent developments in the field.’

– The Environmentalist

‘These volumes present a thorough and wide-ranging survey of the recent literature in ecological economics. They should serve as a valuable reference collection and as an excellent foundation for graduate seminars. They illustrate how ecological economics have converged and coalesced as a field.’

– Richard B. Howarth, Dartmouth College, US

‘By far the most complete and judiciously selected collection of recent contributions to ecological economics now available. Indispensable.’

– Herman Daly, University of Maryland, College Park, US
