

## Handbook of Economics and Ethics

Edited by Jan Peil, Radboud University, Nijmegen, The Netherlands and Irene van Staveren, Radboud University, Nijmegen and Institute of Social Studies, The Hague, The Netherlands

The Handbook of Economics and Ethics portrays an understanding of economic methodology in which facts and values, though distinct, are closely interconnected in a variety of ways. From theory building to data collection, and from modelling to policy evaluation, this encyclopaedic Handbook is at the intersection of economics and ethics.

'This volume pulls together a remarkable collection of contributors designed to challenge the positive-normative dichotomy in economic methodology. . . The intent of this publication is to provide a reference manual for those seeking insights into the connections between economics and ethics. It succeeds in that goal and should become a starting point for anyone who believes that mainstream economics needs methodological reorientation. . . Anyone interested in ethics and economic methodology would do well to have this reference book handy. Highly recommended.'

– J. Halteman, Choice

'This new Handbook of Economics and Ethics makes a substantial contribution as a wide-ranging up-to-date reference work, including original developments, on these two fundamentally interconnected fields. This contribution is particularly timely, given the increasing attention being paid to economics as a moral science. The Handbook contains seventy-five expert entries on subjects ranging from the history of economics and philosophy to conceptual analysis of ethics in various aspects of modern economics, while representing a diversity of views.'

– Sheila Dow, University of Stirling, UK
