Emerging Clusters

Theoretical, Empirical and Political Perspectives on the Initial Stage of Cluster Evolution

Industrial Dynamics, Entrepreneurship and Innovation series

Edited by Dirk Fornahl, Centre for Regional and Innovation Economics, University of Bremen, Germany, Sebastian Henn, Professor, Department of Geography, Friedrich Schiller University Jena, Jena, Germany and Max-Peter Menzel, University of Hamburg, Germany

This book rigorously explores the critical, initial stage of cluster emergence in which the seeds for further growth are sown. Whether economic growth actually occurs, however, ultimately depends on various regional conditions and the processes in place.

‘The empirical data and analysis is rich and well-written and so is the policy section... the book provides a valuable addition to the literature of regional clusters and should be included as a must-read for those involved not only in research, but also in policy-making on regional clusters.’ – Jukka Teräs, Regional Studies
