The International Handbook on Social Innovation
Collective Action, Social Learning and Transdisciplinary Research

Edited by Frank Moulaert, Emeritus Professor of Spatial Planning, Department of Architecture, KU Leuven, Belgium, Diana MacCallum, Senior Lecturer, Urban and Regional Planning, School of Design and Built Environment, Curtin University, Western Australia, Abid Mehmood, Research Fellow, Sustainable Places Research Institute, School of Social Sciences, Cardiff University, UK and Abdelilah Hamdouch, University of Tours, France

The contributors provide an overview of theoretical perspectives, methodologies and instructive experiences from all continents, as well as implications for collective action and policy. They argue strongly for social innovation as a key to human development. The Handbook defines social innovation as innovation in social relations within both micro and macro spheres, with the purpose of satisfying unmet or new human needs across different layers of society. It connects social innovation to empowerment dynamics, thus giving a political character to social movements and bottom-up governance initiatives. Together these should lay the foundations for a fairer, more democratic society for all.

‘Moulaert, MacCallum, Mehmood and Hamdouch’s International Handbook on Social Innovation is a refreshing and stimulating contribution to Edward Elgar’s line of handbooks, appropriate for primarily academics and graduate students researching social innovation, through theoretically oriented practitioners interested in the topic will find much to learn from the book as well.’

– Gordon Shockley, Journal of Regional Science

‘The challenges of poverty and social exclusion cannot be fully resolved through conventional public sector policies and market-led innovation. The case studies in this Handbook capture some of the key success factors of socially innovative action in different socio-economic contexts. This Handbook will inspire readers as it highlights the creativity and commitment of diverse enterprises and movements working for social innovation.’

– Anna Kajumulo Tibajjuka, Minister for Lands, Housing and Human Settlements, United Republic of Tanzania, and retired UN Under Secretary General, immediate former Executive Director of UN-HABITAT

‘Social innovation may not be a new idea but it is clearly an idea whose time has come, not least because the traditional models of innovation – narrowly framed technical models – have run their course and no longer resonate in a world of societal challenges. This Handbook has two great merits – it brings conceptual rigour to the debate and it provides compelling narratives of social innovation in practice.’

– Kevin Morgan, Cardiff University, UK

‘In an era where social innovation is re-emerging as an important policy framework for bringing social transformation, this volume is a significant contribution to the theory and practice of social innovation. The incremental discussion from concepts to theory to practice and then to social innovation research is supported by cases literally from all over the globe. It moves the discourse from isolated models of neighbourhood engagements and social enterprises, to a comprehensive, multidimensional approach combining needs, social relations and empowerment. A must read for academicians, learners, practitioners and policy makers alike.’

– S. Parasuraman, Tata Institute of Social Sciences, Mumbai, India
Social innovation is an important instrument for understanding how contemporary societies deal with social change and how social practices and policies intended to combat poverty and social exclusion are developed and implemented effectively. The Handbook offers a valuable contribution to the development of a clear, transdisciplinary and critical understanding of social innovation practices. The reader will find an in-depth discussion of the most important theoretical approaches to the concept and a thorough exposition of the epistemological and methodological framework for research in social innovation. The volume includes a number of interesting case studies in different areas of social change and issues of policy and governance.’
– Enzo Mingione, University of Milano-Bicocca, Italy
