

Handbook on Waste Management

Edited by Thomas C. Kinnaman, Professor of Economics, Bucknell University, US and Kenji Takeuchi, Professor of Economics, Kobe University, Japan

The significant challenges associated with managing waste continues to attract international scholarly attention. This international handbook scrutinizes both developed and developing economies. It comprises original contributions from many of the most prominent scholars researching this topic. Consisting primarily of empirical research efforts – though theoretical underpinnings are also explored thoroughly – the handbook serves to further the understanding of the behaviors of waste generators and waste processors and the array of policies influencing these behaviors.
