Climate Law in EU Member States
Towards National Legislation for Climate Protection

New Horizons in Environmental and Energy Law series

Edited by Marjan Peeters, Professor of Environmental Policy and Law, Maastricht University, the Netherlands, Mark Stallworthy, Professor of Environmental Law and Policy, Swansea University, UK and Javier de Cendra de Larragán, Dean, IE Law School, IE University, Madrid, Spain

The complex and multifaceted nature of EU climate legislation poses a major challenge for EU member states. This timely book focuses on national climate action, addressing the regulatory responses required for the purposes of meeting greenhouse gas emissions reduction objectives for 2020 (and beyond).

‘The book gives detailed discussions of essential EU climate law and presents profound national reports which cover the transposition of EU law and focus on national climate strategies, which are often complex and sometimes also ambitious. Comparative studies at the grassroots level are an important source of ideas and possibilities and also useful documentation both for researchers and political actors.’
– Erkki Hollo, University of Helsinki, Finland

‘This is an outstanding collection of essays by a multi-national team of leading scholars. It reminds us that in a system of multi-level governance, it is crucial to examine and appraise developments not only at the level of the European Union but also within the Member States. This task has become easier with the publication of this excellent book.’
– Joanne Scott, University College London, UK
