

Handbook of Research Methods in Complexity Science

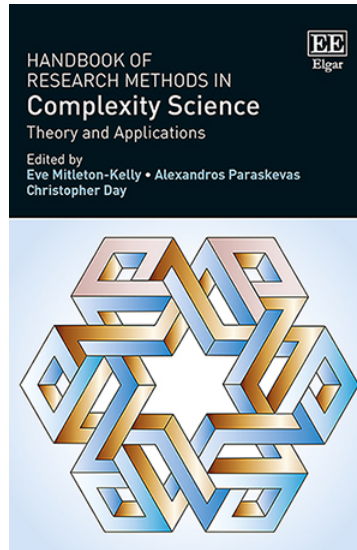

Theory and Applications

Edited by Eve Mitleton-Kelly, Director, Complexity Research Group, London School of Economics and Political Science, Alexandros Paraskevas, Chair in Hospitality Management, University of West London and Christopher Day, Senior Research Associate, Complexity Research Group, London School of Economics and Political Science, UK

This comprehensive Handbook is aimed at both academic researchers and practitioners in the field of complexity science. The book's 26 chapters, specially written by leading experts, provide in-depth coverage of research methods based on the sciences of complexity. The research methods presented are illustratively applied to practical cases and are readily accessible to researchers and decision makers alike.

'The Handbook of Research Methods in Complexity Science is an innovative addition to the literature on complexity theory in social science and policy studies. Many of us appreciate the benefits of a new way of thinking about, for example, complex policy making systems. This book takes the discussion forward by showing how we can research those systems, and use new empirical data to help us improve the way they work. This is an exciting prospects for researchers and practitioners.'

– Paul Cairney, University of Stirling, UK
