Handbook of Social Policy and Development

Edited by James Midgley, Professor of the Graduate School, University of California, Berkeley, US, Rebecca Surender, Senior Research Fellow, University of Oxford, UK and Laura Alfers, Research Associate in Sociology, Rhodes University, South Africa

The Handbook of Social Policy and Development makes a groundbreaking, coherent case for enhancing collaboration between social policy and development. With wide ranging chapters, it discusses a myriad of ways in which this can be done, exploring both academic and practical activities. As the conventional distinction between ‘developed’ and ‘developing’ countries becomes increasingly blurred, this Handbook explores how collaboration between social policy and development is needed to meet global social needs.

‘If you read one book to understand current scholarship on social policy and development in the global south, this should be it. Lucid and comprehensive, it is encyclopaedic in scope. The role of the state is set out and powerfully defended. The bunkers into which the social sciences and policy-making have been artificially divided are exposed and questioned. Robert Kennedy said that GDP measures everything except that which makes life worthwhile: this book covers a large part of what makes life worthwhile.’

– David Piachaud, London School of Economics, UK
