Handbook on the Temporal Dynamics of Organizational Behavior

Research Handbooks in Business and Management series

Edited by Yannick Griep, Behavioural Science Institute, Radboud University, the Netherlands and Samantha D. Hansen, Associate Professor, Department of Management, University of Toronto, Scarborough and University of Toronto, Rotman School of Management, Canada

Handbook on the Temporal Dynamics of Organizational Behavior is designed to help scholars begin to address the temporal shortcomings in the extant organizational behavior literature. The handbook provides conceptual and methodological reasons to study organizational behavior from a dynamic perspective and offers new conceptual and theoretical insights on some of the most popular organizational behavior topics. Unlike many other handbooks, this one provides methodological and analytical tools, including syntax and example data files, to help researchers tackle dynamic research questions effectively.

‘This Handbook is a one-stop shop for scholars interested in all things “dynamic”—theory, method, and analysis. By delving into objective time both deeply (e.g., questioning what dynamic means) and broadly (i.e., coverage across multiple research streams), these authors capture the current state of dynamism in organizational behavior and make provocative suggestions for the future. A must-read for any time scholar.’
– Abbie Shipp, Texas Christian University, US

‘This book is a very novel and innovative approach to understanding organisational behaviour (OB), by focussing on how time affects OB. It is a must read for any student or scholar in the field, informed by global, thoughtful organisational scientists in the field.’
– Sir Cary Cooper, CBE, University of Manchester, UK
