Advanced Introduction to Marxism and Human Geography

Elgar Advanced Introductions series

Kevin R. Cox, Emeritus Distinguished University Professor, Department of Geography, The Ohio State University, US

The Advanced Introduction to Marxism and Human Geography explores the fundamental aspects of Marx’s conceptualization of capital and of capitalist development, including value theory, the class relation, accumulation and the development of the capitalist division of labor. Kevin Cox goes beyond simplistic analysis to further engage with key concepts, and how their relationships with one another can illuminate the human geography of the world.

“When I tell ordinary people I’m a Marxist Geographer, I often get puzzled looks. Kevin Cox’s comprehensive Advanced Introduction to Marxism and Human Geography shows why such a sub-discipline is not only possible but necessary to understanding the political economy of capitalism. He offers a concise and expert overview of Marx’s core theories, and shows how they apply to core geographical issues such as urbanization, social difference, and geopolitics. I very much look forward to teaching with this text!”

– Matthew T. Huber, Syracuse University, US

‘Cox explains in clear language the central categories of classical Marxism, before showing how urbanization, environmental destruction, difference, uneven development, and geopolitics have evolved under capitalism and help reproduce capitalist social relations. This book not only introduces the interrelations between geography and social structures, but is also an exemplary demonstration of how to delve beyond the “facts of the matter” to reveal their foundations and interconnections.’

– Michael Webber, University of Melbourne, Australia

‘Clearly written, this book provides an excellent introduction to key concepts from Marx. It demonstrates their continuing relevance to understanding the political economies of capitalisms and their varied geographies via a range of contemporary examples. It should be of interest to all students of human geography and ought to be compulsory reading for them.’

– Ray Hudson, University of Durham, UK
