Transport and Environment

In Search of Sustainable Solutions

Transport Economics, Management and Policy series

Edited by Eran Feitelson, Senior Lecturer, Department of Geography, Hebrew University of Jerusalem, Israel and Erik Verhoef, VU University Amsterdam

The impact of transport on the environment is a major issue of worldwide concern. This important new book presents state-of-the-art contributions on spatial and technological aspects of transport in relation to environmental degradation, together with analysis of sustainable transport policy.

‘The book is enjoyable and interesting to read and in each individual chapter comprehensive with useful references to the subject.’
– Moshe Givoni, European Journal of Transport and Infrastructure
