Evolution and Path Dependence in Economic Ideas
Past and Present

Edited by Pierre Garrouste, Professor, ATOM, Paris, France and Stavros Ioannides, Associate Professor of Economics, Department of Political Science and History, Panteion University, Athens, Greece

Since the 1980s there has been a renewed interest in attempts to introduce a sense of history into economic literature. In this book, the authors argue that it is not possible to explain a state of the world without first analysing the processes that lead to that state.

The contributions collected in this volume share a critical stance towards the timelessness and a historical theorizing of mainstream economics.

‘The editors are to be congratulated for assembling a volume with considerable thematic integrity. It should be required reading for all those interested in path dependence and represents a useful starting place for those who want to know what all the fuss is about.’
– Mark Setterfield, Eastern Economic Journal
