The Rise and Fall of Czech Capitalism
Economic Development in the Czech Republic Since 1989

Martin Myant, European Trade Union Institute, Belgium

This book offers a detailed, critical account of the economic transformation of the Czech Republic since 1989. It follows the development and implementation of a reform strategy based on ‘shock’ therapy and rapid privatisation, set against the background of turbulent political change and conflict.

‘No other book tells the Czech story so closely and impressively. Myant uses rich sources of information, the original among them being commentaries on individual events by economic journalists and insiders.’
