Shrimp Farming and Mangrove Loss in Thailand

Edited by Edward B. Barbier, Professor of Economics, Senior Scholar, School of Global Environmental Sustainability, Colorado State University, US and Suthawan Sathirathai, Chulalongkorn University, Thailand

Through in-depth case studies of local communities in four distinct coastal areas in Southern Thailand, the authors are able to assess objectively the underlying economic causes, and consequences, of mangrove deforestation due to the expansion of shrimp farms.

‘...essential reading for all who are interested in the ecological and environmental consequences of shrimp farming and its social impacts.’
– Clem Tisdell, Aquaculture Economics and Management
