

Transportation Planning

Classics in Planning series

Edited by Yoram Shiftan, Professor of Civil and Environmental Engineering, The Technion, Israel Institute of Technology, Israel, Kenneth Button, University Professor, Schar School of Policy and Government, George Mason University, US and Peter Nijkamp, Adam Mickiewicz University, Poznan, Poland, Jheronimus Academy of Data Science (JADS) in 's-Hertogenbosch, the Netherlands and the Universitatea Alexandru Ioan Cuza din Iasi, Iasi, Romania

Transportation planning deals with the ways in which governments at various levels try to ensure the effective and efficient movement of people and goods. For this collection, the editors have selected the key previously published papers which analyse some of the major methodological issues involved in modern transportation planning and discuss the main policy questions and debates. The wide range of topics covered includes traffic assignment, developments in modelling travel behaviour, urban travel, the effect of modern telecommunications on travel, congestion and pricing policy.
