Children, Changing Families and Welfare States

Edited by Jane Lewis, formerly Professor of Social Policy, London School of Economics, UK

The book explores the implications of changes to the welfare state for children in a range of countries.

Children, Changing Families and Welfare States: examines the implications of social policies for children; sets the discussion in the broader context of both family change and welfare state change, exploring the nature of the policy debate that has allowed the welfare of the child to come to the fore; tackles policies to do with both the care and financial support of children; looks at the household level and how children fare when both adult men and women must seek to combine paid and unpaid work, and what support is offered by welfare states; and endeavours to provide a comparative perspective on these issues.

‘As welfare states grow up, they begin to think more carefully about their future. Jane Lewis is showing them how best to do so. This stellar collection of articles by top European scholars combines creative thinking about the new social investment state with impressive empirical research on specific forms of public support for family work.’

– Nancy Folbre, University of Massachusetts, Amherst, US
