The Economics of Regional Clusters
Networks, Technology and Policy
New Horizons in Regional Science series
Edited by Uwe Blien, Institute for Employment Research and Technical University of Kaiserslautern, Germany and Gunther Maier, WU Wien, University of Economics and Business, Austria

This important book takes a critical view on regional industry clusters, in particular their identification and formation, and the policies which help create and support them.

‘... this book will be of greatest interest to empirical researchers who wish to stay up-to-date with the recent work from both sides of the Atlantic. The blend of methods, empirics, and policy will also be of value to researchers that are interested in understanding the policy context of their research.’
– Henry Renski, Review of Regional Studies
