Private Standards and Global Governance
Economic, Legal and Political Perspectives

Leuven Global Governance series

Edited by Axel Marx, Deputy Director, Leuven Centre for Global Governance Studies, KU Leuven, Miet Maertens, Johan Swinnen, KU Leuven and Jan Wouters, Full Professor of International Law and International Organizations, Jean Monnet Chair ad personam EU and Global Governance and Director, Institute for International Law and Leuven Centre for Global Governance Studies, KU Leuven, Belgium

The expert contributors assess the state-of-the-art with regard to private regulation of food, natural resources and labor conditions. They begin with an introduction to, and discussion of, several leading existing private standards, and go on to assess private food standards and their legitimacy and effectiveness in the context of the global trade regime.

‘This book draws out the profound implications and transformational dynamics of multi-level global governance of natural resources, labour standards and particularly food safety. The hybrid private–public governance of these supply chains has in some contexts made large western retailer groups more dominant regulators than states. Yet the new regulatory governance is more pluralistic in its flux than a shift from state to retailer hegemony. Governance by contracts of global sway more than government by statutes of states drives regulatory innovation. Legal entrepreneurs and model mongers of many stripes inspire this innovation. Political theory is yet to come to grips with the significance of the shifts this thoughtful collection ably traces.’
– John Braithwaite, Australian National University

‘This edited volume represents a major contribution to scholarship on the role of private standards in global governance. It brings together a wealth of important new research written by a distinguished group of scholars. It is noteworthy not only for the breadth and depth of its case-studies, but by its extensive analysis of the legal dimensions of private standard setting and enforcement.’
– David Vogel, University of California, Berkeley, US
