The global economic crisis of 2008 caused the collapse of the world's financial institutions, large-scale unemployment, the devaluing of housing stocks leading to mortgage defaults and left many countries in debt, unable to meet their financial obligations. The consequences of this in the workplace were substantial and for those who remained employed, longer working hours, heavier workloads, an insecure working environment and micro-management became manifest. Examining the impact of the recession on organizations and individuals at work, this book explores the long-lasting effect the crisis will have on workplaces for the future. An insightful and thorough account of how the economic crisis has unfolded on an international scale is presented and the profound psychological impact that this recession has had on the workplace assessed.

Handbook of Research on Sustainable Consumption
Edited by Lucia A. Reisch, Copenhagen Business School and John Thøgersen, Aarhus University, Denmark

This Handbook compiles the state of the art of current research on sustainable consumption from the world's leading experts in the field. The implementation of sustainable consumption presents one of the greatest challenges and opportunities we are faced with today. On the one hand, consumption is a wanted and necessary phenomenon important for society and the economy. On the other, our means of consumption contradicts many important ecological and social long-term goals. Set against this background, the Handbook aims to offer an interdisciplinary overview of recent research on sustainable consumption, to draw attention to this subject and to encourage discussion and debate. In 27 chapters, leading authorities in the field provide their expertise in a concise and accessible manner.

We were one of the first publishers to agree to include book titles in the new Thomson Reuters’ Book Citation Index. The index is accessed through the Thomson Reuters’ Web of Knowledge research platform by 20 million users across 3,800 research institutions in 90 countries. We expect that this initiative will increase the visibility of Elgar books and help to ensure that citations to your work in our books are fully recognized.

Vanity Economics
An Economic Exploration of Sex, Marriage and Family
C. Simon Fan, Lingnan University, Hong Kong

This book presents an accessible and sometimes controversial economic exploration of numerous issues surrounding sex, marriage and family. It analyzes the role of ‘vanity’, defined as social status and self-esteem, in social and economic behaviors.

In Veblen’s theory of conspicuous consumption, vanity is associated with the consumption of luxuries. In this book, Simon Fan argues that vanity is obtained by having a spouse and children with ‘high-quality’ values, for example, a beautiful wife, a tall husband or intelligent offspring. He demonstrates from various perspectives that vanity plays a crucial role in male–female relationships and intergenerational relationships. In so doing, he challenges the conventional frontier of economics and contributes to other social sciences.

The Political Economy of Status
Superstars, Markets and Culture Change
Theodore Koutsobinas, University of Patras, Greece

‘Global inequality represents the challenge of our age. The Political Economy of Status demonstrates that rising inequality involves profound cultural, psychological, and philosophical changes because it is interlinked with the meteoric growth of superstar markets – that is, markets for positional goods, which now permeate most economies. Consequently, taking on inequality will require not just smart economic policies, but moral leadership.’

– Gary Dymski, University of Leeds, UK

Changing Behaviours
On the Rise of the Psychological State
Rhys Jones, Aberystwyth University, Jessica Pykett, University of Birmingham and Mark Whitehead, Aberystwyth University, UK

‘This volume is well-written and engaging from the start and is based on a detailed analysis of policy making (although international examples are drawn upon). . . I highly recommend this readable and well-informed book to all those interested in policy making and the influence of psychology.’

– Alan Lewis, Journal of Economic Psychology

Handbook on the Economics of Reciprocity and Social Enterprise
Edited by Luigino Bruni, LUMSA University, Rome and Stefano Zamagni, University of Bologna and Johns Hopkins University, Bologna Center, Italy

The recent era of economic turbulence has generated a growing enthusiasm for an increase in new and original economic insights based around the concepts of reciprocity and social enterprise. This stimulating and thought-provoking Handbook not only encourages and supports this growth, but also emphasises and expands upon new topics and issues within the economics discourse.

The Elgar Companion to Recent Economic Methodology
Edited by John B. Davis, University of Amsterdam, the Netherlands and Marquette University and D. Wade Hands, University of Puget Sound, US

Bringing together a collection of leading contributors to this new methodological thinking, the authors explain how it differs from the past and point towards further concerns and future issues. The recent research programs explored include behavioral and experimental economics, neuroeconomics, new welfare theory, happiness and subjective well-being research, geographical economics, complexity and computational economics, agent-based modeling, evolutionary thinking, macroeconomics and Keynesianism after the crisis, and new thinking about the status of the economics profession and the role of the media in economics.

A Handbook of Economic Anthropology, Second Edition
Edited by James G. Carrier, Oxford Brookes University, UK and Indiana University, Bloomington, US

The first edition of this unique Handbook was praised for its substantial and invaluable summary discussions of work by anthropologists on economic processes and issues, on the relationship between economic and non-economic areas of life and on the conceptual orientations that are important among economic anthropologists. This thoroughly revised edition brings those discussions up to date, and includes an important new section exploring ways that leading anthropologists have approached the current economic crisis. Its scope and accessibility make it useful both to those who are interested in a particular topic and to those who want to see the breadth and fruitfulness of an anthropological study of economy.

Handbook of Behavioral Finance
Edited by Brian Bruce, Center for Investment Research and Hillcrest Asset Management, US

“This book does an excellent job of presenting empirical evidence as to the role of selected psychological attributes on key investment behaviors and it should be valuable to investment professionals as a handbook. Professor Bruce has selected readings that clearly show that investors are more than logic machines. They have evolved brains which make them susceptible to context and culture. The book wisely avoids making generalizations about a new behavioral financial paradigm which at this time is only in the early stages of development.”

— Robert A. Olsen, California State University, Chico, US

The Marketing Firm
Economic Psychology of Corporate Behaviour
Kevin J. Vella and Gordon Foxall,
Cardiff University, UK

“The Marketing Firm provides an expert analysis and represents a stepping stone in behaviour analytic approach applied to firm behaviour. In careful but firm steps, the editor and authors manage to leverage the power of case study design in firms’ behaviour and to successfully detail a credible research methodology which expands and deepens the existing state of theory of the marketing firm.”

— Constantin Oprean, Management of Sustainable Development
